RELEASE 26.5 • OCTOBER 8

Paid training programs in CMDS

Training programs with a fee can now be delivered in CMDS

MOTIVATION

Training programs with a fee can now be delivered in CMDS

What's driving it

Keyera is moving Validator Training online, with a fee. Training providers have also inquired about offering paid courses through the CMDS platform.

TODAY

A request has no next step

A learner can ask for a program, but nothing turns the request into access, and nothing records the fee.

IN THE NEXT VERSION (OCTOBER 8)

One workflow, from request to billing

The learner submits a request to enrol in the program, the right person approves it, and approval unlocks the training. Every enrolment request is kept for billing.

Result: paid training runs through CMDS, with a clear record of who approved it and who handles the billing.

HOW IT WORKS

Four steps from catalogue to training plan

TWO WAYS TO PAY

	COMPANY-SPONSORED	SELF-FUNDED
Who approves	The learner's Company Administrators	CMDS administration
Who pays	The learner's company, billed quarterly	The learner, paid before approval

Learners see the fee and what they'll earn

1 The fee shows on the catalogue card

3 After submitting, the date and who to contact

2 What they'll earn, the terms, and two ways to pay

Arc flash and asbestos are two hazards that are easy to underestimate on a facility site. This program helps you recognize both before the work starts and know which controls keep you and your crew safe.

The Arc Flash module is required. Asbestos awareness is optional, and recommended if your work takes you into older buildings or equipment. Both appear in your training plan as soon as your enrolment is approved, and each is recorded as an achievement when you complete it.

What you will earn

Enrollment assigns these achievements to your training plan

Arc Flash Required

Asbestos

Terms and conditions

Program fees are non-refundable. Once your request is approved and you are enrolled, the fee is due in full and cannot be refunded, transferred, or credited, including if you withdraw from the program or do not complete it. A company-sponsored request is billed to your organization; a self-funded request is billed to you.

Choose how the program fee will be paid. You will be asked to agree to the terms before the request is sent.

☒ Self-funded request

☐ Company-sponsored request

AFTER APPROVAL

Approved learners use the plan they know

1 The Program filter narrows the plan to one program

The screenshot shows a web interface titled "Training Plan for Test Learner Two". At the top, there is a "Program" filter set to "Demo Program". Below this, a note says "Hide the completed achievements in my training plan. (Only incomplete items are shown by default.)". The main section is titled "e-Learning Modules" and contains two items: "Arc Flash" with a red flag icon and a blue "Required" button, and "Asbestos" with a red flag icon, a blue "Optional" button, and a blue "Valid for 12 months" badge.

2 Home page: the catalogue button and My Programs

The screenshot shows a web interface titled "Competency Management and Development System". At the top, there is a navigation bar with four buttons: "eLearning" (green), "Academy" (blue), "Training Plan" (grey), and "Education & Training" (grey). Below the navigation bar, there is a large white box with a blue icon of three stacked diamonds and the text "My Programs". At the bottom of this box, the text "Demo Program" is displayed.

Certificates for course completion are issued when every achievement is earned, as it is today.

Every paid enrolment is a billing record

Direct enrolment asks who pays

Add Learners to Program - Demo Program

Paid program

This program has a fee of \$199.00. Each learner you add is enrolled immediately, and an approved enrollment request is recorded for billing. Choose how the fee is funded before adding learners.

Funding path

☐ Self-funded (billed to the learner)

☐ Company-sponsored (billed to the organization below)

Learner's organization

The organization the learners below are searched in. A company-sponsored request is also billed to it, so it is required for that funding path. A self-funded request is billed to the learner.

HOW BILLING WORKS

Company-sponsored

Billed to the company each quarter

Self-funded

The learner pays CMDS before approval

1

Fee locked in

Learners pay the fee they saw, even if the price changes later

2

Full history

Who asked, who decided, and when

3

Survives archiving

Kept even after the learner's account is archived

4

Direct enrolment

An administrator enrolling someone must choose who pays

5

No group shortcuts

Paid programs can't be assigned to a whole group

Every paid enrolment is a billing record

Direct enrolment

Add Learners to Program - Demo Program

Paid program

This program has a fee of **\$199.00**. Each learner you add is enrolled immediately, and an approved enrollment request is recorded for billing. Choose how the fee is funded before adding learners.

Funding path

- ☐ Self-funded (billed to the learner)
- ☐ Company-sponsored (billed to the organization below)

Learner's organization

The organization the learners below are searched in. A company-sponsored request is also billed to it, so it is required for that funding path. A self-funded request is billed to the learner.

1 Fee locked in

Learners pay the fee they saw, even if the price changes later

2 Full history

Who asked, who decided, and when

3 Survives archiving

Kept even after the learner's account is archived

4 Direct enrolment

An administrator enrolling someone must choose who pays

5 No group shortcuts

Paid programs can't be assigned to a whole group

SETUP

Configuration items

1

Confirm your approvers

Request emails go to your Company Administrators team. Confirm the people you need are on this list.

2

Name the catalogue

"Academy" is a working title. The home page displays a shortcut button to take learners directly to the catalogue of paid programs.

3

Sign off the terms

The non-refundable terms on the program page need business review before launch.

NOT IN THIS RELEASE (IDEAS FOR FUTURE IMPROVEMENT)

Online payment so self-funded learners can pay directly in the CMDS site; program progress reporting on the home page.

OVER TO YOU

Questions and feedback

If time permits we can look at the catalogue in the test environment

IF TIME PERMITS

A two-minute walkthrough of paid training programs in CMDS

1 As the learner

Home page, catalogue button, the program's card, Company-sponsored request, confirm

2 As the Company Administrator

Open the request email and click the link, or use the search page for program enrollment requests, and approve

3 As the learner again

Home page, My Programs, the program's training plan

CONCEPT OVERVIEW FOR CMDS USERS

New evolution in Validator Training

Why the program is changing, how it improves the Validator experience, and what comes next

THE CORE MESSAGE

The redesign strengthens how Validators make and defend decisions while allowing for a more efficient delivery of the material

KEEP

CMDS foundational elements

The two-party competency process

CMDS validation methods

Competency and profile structure

Ethics cases and system workflow

STRENGTHEN

Validator practice

Evidence quality

Observation and questioning

Understanding and addressing various types of pressure Validators encounter

Consistent decisions and defensible notes

PROVE

Readiness to validate

Knowledge assessment

Live calibration and practice

Ethics commitment

Potential field verification pilot

The new program aims to add a more structured and supportive process to new Validators without replacing the key ingredient that is a Validators judgment.

The current workshop has a strong CMDS-specific foundation

1 Purpose and due diligence

Connects competency verification with legal duties, regulatory safety requirements, and tools for effective validation meetings.

2 CMDS process knowledge

Explains profiles, competencies, self-assessment, validation, and system status.

3 Validation methods and principles

Covers demonstration, simulation, subject matter reference, and re-validation. Sets out important factors for successful validation meetings.

4 Real workplace judgment

Uses recognizable cases involving experience, confidence, relationships, and pressures.

5 Coaching and gap closure

Explains how Validators support development when evidence is insufficient and how to effectively develop worker's knowledge, skills and experience to create competent operations teams.

6 Ethics and integrity

Makes the link between skilled, ethical Validators and a competent workforce.

Six gaps limit consistency after the classroom session

1	Evidence	Methods are covered, but strong and weak evidence are not clearly classified.
2	Assessment quality	Valid, reliable, objective, and defensible decisions are not taught as one model.
3	Repeatable workflow	Prepare, observe, question, evaluate, document, and provide feedback appear across sections rather than as one routine.
4	Bias controls	Ethical dilemmas are strong, but common bias types and practical controls remain implicit.
5	Documentation	Validation comments exist, but users need a clearer standard for evidence-based notes.
6	Qualification proof	Attendance and knowledge checks do not fully demonstrate applied Validator judgment.

The proposed pathway combines efficient learning with live calibration

OPTIONAL PILOT AFTER ACTIVATION

A 90-day field verification could include two supervised validations, a record-quality review, and a calibration discussion. CMDS governance must approve this step before launch.

eLearning modules build from responsibility to applied Validator judgment

Each module uses decisions, evidence sorting, interviews, or case work instead of long content screens.

The new program makes the evidence standard visible

SCENARIO

A respected senior operator performs most of a compressor startup correctly but misses a required verification step and cannot explain why it matters.

CURRENT EXPERIENCE

The workshop asks the right ethical questions

Users discuss experience, fairness, relationships, and whether the person should pass. The quality of evidence may remain implicit.

NEW EXPERIENCE

The learner applies a repeatable decision test

What evidence exists? Is the missed step material? What question tests the gap? What additional evidence would change the decision? How should the note document the result?

Result: discussion moves from opinion to evidence tied to the competency requirement.

A six-step workflow gives Validators a common operating rhythm

1 PREPARE

Review requirements, resources, achievements, risk, and method.

2 OBSERVE

Watch hazards, procedure use, controls, decisions, and communication.

3 QUESTION

Test knowledge, risk recognition, and response to changing conditions.

4 EVALUATE

Separate observed evidence from tenure, confidence, and reputation.

5 DOCUMENT

Record specific evidence that supports the decision and any gaps.

6 FEEDBACK

Explain the result and define development or reassessment needs.

Qualification should demonstrate readiness, not only course completion

GATE	PROPOSED EVIDENCE	WHAT IT SHOWS
Online modules	All required interactions completed	Course completion
Knowledge assessment	Proposed 90% pass mark	Understanding of core principles
Discussion and calibration	Attendance and active participation	Applied judgment and questioning
Ethics commitment	Signed acknowledgement	Acceptance of Validator responsibilities
Field verification pilot	Two supervised validations and record review	Transfer into workplace practice

The 90% threshold, participation rubric, and field verification require CMDS approval.

The direction is clear, but several policy and design choices remain open

Agreed upon direction

Hybrid learning model

eLearning module architecture

Focus on evidence collection and Validator judgment

Live calibration session

Draft question bank

Still to approve

Final qualification gates and pass mark

Formalization of practical participation rubric and support tools

Whether to pilot 90-day field verification

Periodic retraining requirements for Validators

Additional input from stakeholders

Final wording of policy-sensitive content

The direction is clear, but several policy and design choices remain open

Questions for CMDS users

Which parts of the current workshop must remain?

Where do Validators struggle most after training?

Which proposed qualification gates add value?

What would make the field tools useful during real validations?

**Your feedback
helps improve
the build!**

RELEASE 26.5 • OCTOBER 8

Compliance reporting in CMDS

The compliance summary now shows live data, and a new report shows the trend over time

MOTIVATION

The compliance summary report is now up-to-the-minute

A popular request

Many administrators asked for live compliance results. On a typical day, CMDS records more than 1000 competency status changes and more than 600 achievement changes. Waiting until the next day to see that is not ideal.

TODAY

A nightly snapshot

The report reads a snapshot taken overnight. Depending on the time of day you run the report, the results are up to a day old.

IN THE NEXT VERSION (OCTOBER 8)

Calculated live

The report is calculated from current data whenever you run the report. A competency status change made a minute ago is already in the numbers.

Result: the compliance score you see is the compliance score right now.

The same report, live and faster

1 Simpler criteria: no report type, no dates, no refresh banner

The screenshot shows a configuration form for a compliance report. It includes several sections: 'Departments' with a dropdown set to '2 Departments'; 'Membership' with checkboxes for 'Department Employment' (checked), 'Organization Employment', and 'Data Access'; 'Employees' with a dropdown set to 'All Employees'; 'Achievement Type' with a dropdown set to 'All Achievement Types'; 'Options' with radio buttons for 'Show department and worker summary' (selected), 'Show department summary only', 'Show the count per validation status', 'Show chart' (checked), and 'Show users without a profile assignment'; and 'Profiles' with radio buttons for 'Profiles that require compliance' (selected), 'Only primary profiles', and 'All profiles'. At the bottom, there are two buttons: 'Report' and 'Download XLSX'.

ORIENTATION DEPARTMENT

Before

How the two reports differ

1

Live versus monthly

The summary is calculated live. The trend reads a snapshot taken each week, keeping the last one in each month.

2

Close, not identical

The snapshot counts department employment only, and primary or compliance profiles, so the latest month won't match the summary exactly.

3

Your departments only

Both reports list only the departments your account can access, exactly as the summary does today.

HISTORY IS KEPT FOR 24 MONTHS

After October 8, CMDS keeps one department compliance snapshot per month for the past 24 months. Older snapshots are removed. If you need figures from before November 2024, export them before the release.

OVER TO YOU

Questions and feedback
